

Resume

Basic Information

Name : Ashwani Rai

Course : PGCP-BDA, Feb26

Address : S/O MUNINDAR RAI H.N. 856/11
6 SWAMI AYAPA, SCHOOL KE PASS, Bilhari,
& PO: Bilhari, DIST: Jabalpur, Madhya Pradesh 482020,
Jabalpur, MADHYA PRADESH

CCPP ID : PB0009

PGCP-BDA Marks

S.NO.	Module	Maximum Marks (Theory)	Obtained Marks
1	Linux Programming and Cloud Computing & Data Collection and DBMS	40	35
2	Java Programming	40	27
3	Python & R Programming	40	38
4	Advanced Analytics and Statistics	40	35
5	Data Visualization - Analysis and Reporting	40	37
6	Big Data Technologies	40	31
7	Practical Machine Learning	40	39
	Total	280	242

Academic Details

Level	Stream	Institute	Board/University	Passing Year	Degree %	Division
BTech	Electronics & Communication	Gyan Ganga Institute of Technology and Sciences, Jabalpur	Rajiv Gandhi Technical University, Bhopal, Madhya Pradesh	2024	86.6 %	I
XII	SCIENCE	Kendriya Vidyalaya CMM	CBSE	2020	68.2 %	I
X	General	Kendriya Vidyalaya CMM	CBSE	2018	79.00 %	I

Academic Projects

Title : AURA-NEOC | Agentic AI & Deep Learning SCADA Command Center

Platform : Python, PyTorch, Streamlit, Generative AI (LLMs & Agentic AI), and Git/GitHub **Duration** : 1 Month

Description : AURA NEOC is an Agentic AI and Deep Learning SCADA Command Center for real-time anomaly detection. I engineered a PyTorch Multi-Layer Perceptron trained on 40,000 telemetry records, achieving 90% recall on critical anomalies using gradient backpropagation for Explainable AI (XAI). I architected a Tri-Engine AI system integrating ChromaDB Vector RAG, Groq LPU, and Ollama to power a strict, safety-guardrailed chatbot that instantly generates context-aware emergency directives from live sensor streams. Additionally, I integrated Plotly time-series streaming, advanced state management, and automated FPDF incident reporting. This production-grade ML and LLM integration resolves high-stakes industrial safety challenges while ensuring system resilience.

Project Repository : <https://github.com/Ashwani0402/DL-project>

Title : GenAI News Aggregator – Big Data ETL Pipeline

Platform : Python, Apache Airflow, Apache Kafka, PySpark, and ETL Pipelines. **Duration** : 1 Month

Description : Built an end-to-end big data ETL pipeline ingesting 8+ news sources via Kafka streaming. Used distributed processing, Groq LLM for AI summarization & sentiment analysis, and Airflow for orchestration. Data loaded into DB, served via REST API to an interactive dashboard with real-time visualizations. Features personalization, subscriber management, and automated email digests. Designed for horizontal scalability to process millions of articles. Achieved 85% reading time reduction through AI summarization.

Project Repository : <https://github.com/Ashwani0402/ai-news-aggregator>

Title	: Self-Balancing Robot	
Platform	: Embedded C	Duration : 6 Months
Description	: Designed and built a self-balancing robot from scratch using Arduino Nano, MPU-6050 sensor, L298N motor driver, and DC motors. Programmed a PID controller in C++ to process real-time tilt data and adjust motor speeds. Connected all components on a lightweight sun board chassis using soldering and jumper wires. Calibrated the gyroscope at startup for accurate angle reading. Achieved autonomous balancing, forward/backward movement, and recovery from light pushes.	
Project Repository	: https://github.com/Ashwani0402/Major-project	

Other Information

LinkedIn	: www.linkedin.com/in/ashwani--rai
Technical Certification	: Programming Essentials in Python(Cisco Networking),C(Cisco Networking), C++(Cisco Networking), Cybersecurity(Cisco Networking), Generative Ai(LinkedIn)
Extra Curricular	: Served as Event Coordinator, Core Committee Team Lead, and Sports Captain
Hobbies	: Playing cricket , listening to music, watching movies.

Personal Information

Date of Birth	: 04/04/2002	Gender	: Male
Nationality	: Indian	Passport	: Available
Languages Known	: Hindi,English		

I hereby declare that the information given above is true to the best of my Information knowledge belief.
